Subject: FW: Leavenworth NFH NPDES permit public notice

Breean, thanks for the voicemail and update. Here's some information from Charles Bert on our R10 WebTeam that could be helpful on getting the information posted. The hatchery contacted me last week asking when Ecology expected to go out for public comment on the 401 cert, so I'll let them know the expected date is next Wednesday, August 9.

Ok cool, thanks. It seems like they could just put it on their public calendar here: <https://fortress.wa.gov/ecy/publiccalendar/> and link to our draft permit documents here: <https://www.epa.gov/npdes-permits/npdes-draft-permit-leavenworth-national-fish-hatchery-washington>. We could also add a note to that page referencing Ecology's 401 public notice, if needed.
